STANDARD ICON DIRECTORY

It certifies that the electrical and electronic equipment do not contain levels of lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyls (PBB) and polybrominated diphenylethers (PBDEs) above the legally permitted limit

ISO9001: certification of the management system

All the machine components in contact with water and steam undergo the Ruveco Teck coating process which drastically reduces the risk of release of metals in the delivered beverages

The CSQ-CERT certification body offers complex services in the field of Environmental Management System according to the ISO14001

The CSQ-CERT certification body offers complex services in the field of Quality Management System according to the IS09001

Listed by the National Sanitary. Foundation. NSF, an independent testing organization, lists products which meet their criteria for sanitation and cleanability Certification of products and materials intended for contact with food and drinking water on the U.S. market

The Canadian Standards Association(CSA) is a nonprofit association serving business, industry, government and consumers in Canada and the global marketplace.

Conformance European With the CE mark, which is obligatory in the European Union member countries, the manufacturer states that the individual product is compliance with the general safety regulations in the CE-marking directives.

Underwriters Laboratories The UL Listing Mark attests that products have been tested and evaluated according to the US safety standards

The cUL Listing Mark attests that products have been tested and evaluated according to the Canedian safety standards

The C UL US Listing Mark attests that products have Canadian safety standards

The UL EPH mark appear on products that have been evaluated to Environmental and Public Health Standards. The "Classified" version is used for products complying with ANSI/NSF Standards and other food equipment hygiene codes and requirements. Examples include Food Service and Meat and Poultry Plant Equipment and Drinking Water Additives. The "Listed" version is typically used for products complying with UL's own published EPH Standards for Safety.

ETL Testing Laboratories

The Eco-design Directive for Energy-using Products (2005/32/EC) was adopted in 2005 and came Into force in August 2007. It establishes a framework under which manufacturers of energy-using products (EuP) will, at the design stage,be obliged to reduce the energy consumption and other negative environmental impacts that occur during the product's life cycle. This is an article 95 directive which means adoption will be aligned in all member states.

Registration, Evaluation, Authorization and Restriction of Chemicals

Restriction of Hazardous Substances, RoHS is the standard used to make sure certain substances are not used in electronic products. The legislation limits use of lead, polybrominated diphenyl ethers, mercury, hexavalent chromium, cadmium and polybrominated biphenyls.

The International "emc-Mark" appears on products meeting the electromagnetic compatibility requirements of Europe, the United States, Japan, Australia, or any combination of the four.In the United States, some types of products can't be sold without proof of compliance to U.S. electromagnetic compatibility requirements. The types of products that are subject to EMC testing include medical and dental equipment, computers, microwave ovens, televisions, radios, transmitters, and radio-controlled equipment

Products have been designed and manufactured to comply with any ad all specifications set out by the Australian Communications Authority(ACA) in regards to Electromagnetic Compatibility. As testament to such compliance these units bear the C-Tick symbol

Norway - NEMKO
(Norwegian Board for Testing and Approval of Electrical Equipment) The recognized association for Norwegian standards is the Norwegian Electrotechnical Committe (NEK). NEK starndards are identical to IEC and CENELEC.
The NEMKO mark molded into a plug or connector indicates that a product has been tested and approved by NEMKO.

ISO 9001:2008 certification has been in place for over a decade now and is used by both customers and companies as a method of controlling their quality. The Standard provides a framework to manage your business and ensure a philosophy of continual improvement in all aspects of your business.

The China Compulsory Certificate (CCC), which is obligatory, attests that products are complying with Chinese standards

Every operation serving or selling food needs to have a food safety system in place that is designed specifically to guarantee the food being served is safe to eat.This specific food safety system is called HACCP for hazard analysis and critical control point.

Roll in Proofer

- Automatic intelligent digital display control board, automatic temperature and humidity, independent control.
- Large volume, vehicle push out, convenient and fast, save manpower
- Double layer stainless steel, PU insulation layer. Hot air circulation against flow design, temperature and humidity are distributed evenly.
- Optimal temperature:36-38℃
- Optimal humidity:80-85℃
- Max temperatre setting:50℃

Automatic Proofer

- With microcomputer touch control panel, temperature, humidity and time are controlled separately, which have high accuracy; Automatically add water, with anti - burn - dry protection device.
- Stainless steel material, which is durable and clean.
- The fermentation box is a box-type structure with a spacious glass window to observing the fermentation of bread. The movable stainless steel round bar as a shelf, which can be disassembled at will.
- Thicken the insulation layer to effectively reduce heat loss.
- Optimal temperature:36-38'C
- Optimal humidity:80-85'C
- Max temperatre setting:50'C
- Runner spacing: 90mm

Standard Proofer

- Microcomputer control panel, independent control of temperature and humidity;
- High-performance moisture-proof fan, with automatic circulation of internal temperature and humidity, produces the optimal fermentation environment with relative humidity of 80-85% and temperature of 36-38°C in the fermentation chamber;
- Automatic water inlet and drainage, with anti-fog, moisture-proof and insulating lighting;
- Large glass window, easy to observe, stainless steel layer can be arbitrarily removed, easy to clean;
- Optimal temperature:36-38°C
- Optimal humidity:80-85°C
- Max temperature setting:50°C
- Runner spacing: 105mm

Common Proofer

- High precision EGO control panel, independent control of temperature and humidity;
- The large glass window is easy to observe, and the stainless steel shelf can be disassembled arbitrarily for easy cleaning
- Used for the fermentation of bread, toast, hamburger and other bread products before baking
- Stainless steel material, exquisite workmanship, beautiful and durable
